

Save one life and we save the world

Our Mission.....

The Phoenix Charity has a 3-part mission. Rescue and Recovery, Rehabilitation and Awareness. We work diligently to ensure once a victim is recovered, they have the proper steps in place for their rehabilitation. We ensure they are placed in a secure location, have their basic needs met and physical reminders are removed.

This evil epidemic is all around us and we at The Phoenix Charity are actively working to have a presence in multiple locations throughout the United States. Wherever we can assist, that is where we will be.

The Phoenix Charity, based in Houston Texas (the #1 port for human and sex trafficking) is currently working with other major cities within Texas and is in progress to expand to other states such as Mississippi and New York.

As part of The Phoenix Charity's 3-part mission, AWARENESS is of most importance. The phoenix Charity firmly believes that through the education of today's youth, along with their parents, the demand for such evil will be terminated. This next generation can truly Stop The Demand!!

Along with speaking engagements to church, political, social and school organizations, we at The Phoenix Charity are active in the following:

- Educating the public at the primary level
- Changing laws to help the victims and punish the abuser
- Training hospital ER staff on what signs to recognize in victims of sex trafficking
- Hosting a Parent Support Group
- Working with hotels and Bureaus of Tourism to develop a system of compliance recognizable by all patrons
 - (many hotels/motels concierge programs cater to patrons by using trafficked youth)

While the mention of human and sex trafficking is becoming more prevalent on social media and the news on T.V., it is still an epidemic that many do not realize is hitting so close to home that it could literally be right next door in their expensive gated community.

Many believe it's "over there" and not "here" in the United States. Sadly over 300,000 children fall victim to sex trafficking every year. Only through education, opening our circle of awareness and keeping a watchful eye can the demand ever be stopped.
